

FIX MY STREET

Fixmystreet.com allows anyone with an internet connection to report, view, or discuss local problems such as graffiti, fly tipping, broken paving slabs, potholes and much more.

By simply going to the website at www.fixmystreet.com and entering a nearby UK postcode, or street name the system will display a map where anyone can pinpoint the area where there is an issue and give details of the problem.

The website sends a report to the appropriate council for action. Currently the website is recording and passing on about 4,000 local issues each month.

Fixmystreet.com is advertising that a new i-phone and android mobile phone app will be available shortly to make reporting even easier.

This is a real step forward for communities and community champions to keep their councils up to date on repairs that can be scheduled in line with regular maintenance checks to urgent items needing more immediate attention.
